

7th and 8th Grade Math Club

7th and 8th grade students who enjoy math meet in Room 6 on Fridays throughout the year. Meetings start at 2:30 and end at 3:15.

We spend our time together working on high-level word problems as well as math concepts typically found in math competitions. Students are encouraged to bring in interesting math problems they encountered and share them with the group.

The Math Counts competition team is selected from this group. In order to be eligible to participate on the team, students must attend the Friday meetings. The team of 8-10 students is selected in January to compete at Union County College Math Counts competition.
