

Challenge Math – Grade 3

This club is all about solving challenging math problems. The students will solve problems from the Noetic Learning Challenge Math Contest as well as other math challenges – Ken Ken, Logic problems, and Number Jumbler. Students will at first be encouraged to work in small groups, but as the year progresses, students will work independently. All this will lead to the national math challenge from Noetic Learning in April. – This club meets Wednesdays with Mrs. Alexander in Room 19.
