

# Pre-K Clubs

Creative Kids Club is a Literature based club that involves higher level thinking skills such as logic, problem solving, creativity, and forming analogies. The literature, lessons and projects are designed to stimulate your child's thinking ability and creative talents.

Gobble Up Math Club allows us to expand on our classroom math and problem-solving skills. We will explore geometry and shapes, numbers, counting, sorting, ordering and matching. Our hands on projects help to bring our math learning to life! We will often cook and bake while we gobble up measuring, mixing & ordering. We even taste the yummy results.

Health and Fitness club is designed to teach children about healthy habits and exercise. We will explore many forms of exercise including sporting games. Students will also learn about eating healthy foods. Students should wear sneakers when coming to Health and Fitness Club. Since we will be learning about healthy eating, please send a healthy snack before we start our workout!
